

Purple Sky, LLC

Joint Venture

Purple Sky, LLC is an SBA 8(a) certified mentor-protégé joint venture that combines the agility and low-code innovation of Sky Solutions with the mission-scale expertise of Leidos, an industry and technology leader serving government and commercial customers with smarter, more efficient digital and mission innovations.

Our goal is to deliver secure, modern IT solutions that enable agencies to accelerate transformation, strengthen service delivery, and improve outcomes. With proven capabilities in cloud-native development, AI, DevSecOps, and user-centered design, Purple Sky is uniquely positioned to help government leaders modernize legacy systems and meet the evolving demands of today's digital landscape with speed, precision, and measurable impact.

Core Capabilities

Advancing Health Data Interoperability

- Empower agencies to improve patient outcomes through standards-based, interoperable data exchange. Our work supports ASTP/ONC's USCDI+, HL7 integration, and EHR modernization efforts at DHA, IHS, and CDC.
- **Outcome:** Improved care coordination, faster data sharing, and better public health insights.

Enhancing Program Integrity and Reducing Fraud, Waste, and Abuse

- Modernize case management and data analytics platforms to help agencies identify and prevent improper payments, ensuring trust in public programs.
- **Outcome:** Reduced fraud, improved compliance, and increased operational efficiency across programs, leading to reduced expenditures and better health outcomes.

Driving Equity and Efficiency in Grants Management

- Enhance transparency and performance in grant awarding and oversight by using AI, LC/NC, and process automation tools.
- **Outcome:** Increased accountability, diverse applicant engagement, data-driven decision-making, and shorter timeframes to award.

Modernizing Claims and Disability Processing

- Enable faster and more accurate claims adjudication using integrated data systems, RPA, and AI to support state-administered Medicaid programs and automate claims-related processes for SSA beneficiaries.
- **Outcome:** Reduced processing times and processing errors, service providers receive payments faster, and improved user satisfaction in states and agencies.

Accelerating Biomedical Research and Lab Modernization

- Support secure, scalable lab systems, leveraging scientific computing, AI, cloud and DevSecOps to drive biomedical innovation at DHA and other federal R&D hubs.
- **Outcome:** Faster research-to-impact cycles and compliant laboratory data environments.

Securing National Infrastructure and Data

- Safeguard taxpayer, social security, and additional data with a resilient, modernized infrastructure.
- **Outcome:** Prevent data loss, breaches, and misuse while advancing a more connected, agile, and secure digital future for operations.

Enabling Technologies & Skills

- AI / ML & Predictive Analytics
- Low-Code / No-Code Platforms
- DevSecOps, IaC & Full Stack Development
- RPA & Digital Process Automation
- Cloud Engineering and PaaS (AWS, Azure, IBM Cloud)
- Cybersecurity & Zero Trust Architecture
- Centers of Excellence and Communities of Practice

Certifications

- CMMI Level 3 for Development and Services
- ISO 9001: Quality Management
- ISO 20000: IT Service Management
- ISO 22301: Business Continuity
- ISO 27001: Information Security

Combined Past Performance

- **CDC** – Scalable, secure mission software solutions that enhance surveillance and interoperability
- **DHA** – Labvantage LMS integration and EHR modernization
- **SSA ITSSC II** – Case management modernization and claims processing support
- **NIH** – Automating grants management process using AI and RPA
- **FTC** – Data management and cybersecurity for the Sentinel Network (20+ TB, millions of users)
- **CMS** – Case management modernization and AI supporting program integrity and fraud, waste and abuse
- **IRS** – Safeguarding taxpayer data from misuse
- **DOD DMA** – Streamlining, consolidating, and modernizing the digital experiences of DoD public-facing websites
- **ASTP/ONC USCDI+** – Establish, harmonize, and advance the use of interoperable data, reducing manual work and errors
- **CMS** – Improve and standardize usability of the Medicaid.gov and InsureKidsNow.gov websites
- **DOJ** – Modernize grants management processes by consolidating 32 separate legacy applications
